

Step 4

Step on Stepik: <https://stepik.org/lesson/3361/step/4>

Мы можем указывать в одной ячейке несколько команд. Для примера напечатаем "Hello!" и посчитаем сумму: $2 + 2$.

The screenshot shows a Jupyter Notebook interface. The top bar includes a 'Projects' tab with 'robin' selected, and a toolbar with icons for file operations, search, and execution. The main area displays a code cell with the following content:

```
In [2]: print('Hello!')
        print(2 + 2)
```

The output of the cell is shown below the code:

```
Hello!
4
```

On the right side of the output, a status bar indicates 'less than a minute ago' and '0.009 seconds'. Below the output, there is an input prompt 'In []: '.

Видим в выводе результат выполнения обеих команд.
